EMISSIONS
SOLUTION

At alahram, we believe that data transparency and quality are key to curbing methane emissions in the oil and gas industry. We have therefore developed a consistent, field-level, upstream oil and gas methane emissions database that incorporates and combines publicly available methane data, proprietary facility-level estimations, and global satellite data measurements in a consistent manner. The database is continuously updated with the latest available information—also from satellite detections.

We are committed to providing you access to data and commensurates that synthesize the market implications of trends and key events. With our expert views, all backed by alahram's unparalleled data universe, you can make informed decisions and stay ahead of the game
